Product Description

AISI Hot Rolled 316 Stainless Steel Sheet NO.1 Surface Finish 1500*6000 MM

316 stainless steel can be used with seawater, provided precautions are taken to avoid crevice corrosion developing under sediments, precipitation and biofouling, and at designed-in crevices. Grade 316, and Grade 304 , may suffer stress corrosion cracking in solutions containing chloride ions at temperatures over about 60°C. Stress corrosion cracking should be considered for all corrosion services where the corrosive liquid may contain chloride.
